Preface

This book serves as an introduction of bookdown. The purpose is identifying application of this to technical manuals and documents.

Outline

We start by introducing the tidy text format, and some of the ways dplyr, tidyr, and tidytext allow informative analyses of this structure.

- **Chapter 1** demonstrates basic, fundamental features.
- **Chapter 2** demonstrates basic table features.
- **Chapter 3** demonstrates examples of incorporating charts and diagrams into the content.
- **Chapter 4** demonstrates incorporation of external images

Chapter 3

Diagrams and Charts

There are a number of methods for adding charts and diagrams.

3.1 Inline Graphviz diagrams with DiagrammeR

3.2 Basic line chart with ggplot2 and geom line

3.3 Summary

Chapter 4

Images

This section is for basic images / graphics.

4.1 Basic PNG

This is a basic PNG image reference

4.2 Simple PNG File (Centered, 50%)

This is a simple centered PNG file

```
\begin{figure}
```

`\caption{Centered PNG at 50%} \end{figure}`

4.3 Simple PNG File (Right-Aligned, 30%)

This is a simple right-aligned PNG file. SVG files don't seem to work with PDF output..

`\begin{figure}`

`\caption{Right-Aligned SVG at 30%} \end{figure}`

4.4 Show two images horizontally

You can combine multiple images into a single figure.
